Summary

Full-stack developer with expertise in Next.js, React, Node.js, and Express.js, specializing in building scalable web applications with RESTful APIs and modern authentication (OAuth/JWT). Experienced in database design (MySQL, PostgreSQL) and cloud integration (AWS/Azure). Passionate about creating efficient, user-centric solutions and adept at collaborating with cross-functional teams to deliver high-impact projects. Eager to apply my skills in Laravel and expand my backend expertise in PHP ecosystems.

Education

Alexandria University

Bachelor of Computer And system Engineering

Sep. 2019 – July 2024

Alexandria , Egypt

Skills

Languages: Python, Java, C/c++, HTML/CSS, JavaScript, SQL, Dart, Cypher

Frontend: Next.js, React, Angular, HTML/CSS, Flutter

Backend: Next.js, Node.js, Express.js, Spring Boot, REST APIs, Swagger

Databases: MySQL, PostgreSQL, MongoDB, Neo4j, S3Bucket

Coursework: OOP, Data Structures, Software Methodology, Algorithm Analysis, Database Management, Artificial Intelligence, Computer Architecture

Experience

Obelion.ai

Software Engineering Intern

Nov 2024

Remote, Egypt

- Developed and deployed robust web applications using React, HTML/CSS, and Next.js, enhancing front-end development skills and ensuring optimal user experiences.
- Gained hands-on experience with Node.js for backend development, implementing scalable server-side solutions and RESTful APIs.
- Utilized Docker for containerization, streamlining application deployment and improving development workflows.
- Worked on cross-platform mobile application development with Flutter, delivering responsive and efficient mobile solutions.
- Contributed to various projects and tasks, showcasing adaptability and proficiency in integrating new technologies into real-world applications.
- Collaborated effectively with a remote team, honing communication and teamwork skills in a professional setting.

Projects

CloudGate (Multi-Cloud Automation Tool) | Next.js, Express.js, AWS SDK, Azure API, Tailwind CSS

2025

- Created a dashboard to automate cloud service deployment across AWS, Azure, GCP, and Alibaba Cloud.
- Designed a Next.js front-end with interactive UI for cost/comparison analytics.
- Designed and implemented microservices-based backend APIs using Express.js and Next.js, leveraging RabbitMQ for seamless multi-cloud provisioning via vendor SDKs.

Tripma (Travel Booking Platform) | Next.js, OAuth (Google/Facebook), Express.js, MongoDB

2025

- Developed a full-stack travel booking platform with Next.js for server-side rendering and dynamic routing.
- Implemented OAuth 2.0 for secure user authentication (Google/Facebook login).
- Built RESTful APIs with Express.js for flight/hotel bookings and integrated real-time pricing via third-party APIs.

Attend (Event Management System) | React, Express.js, JWT, PostgreSQL

2025

- Engineered a multi-role platform (Admin, User, Venue Owner, Supplier) for event planning.
- Features: Event creation, venue booking, supply ordering (catering, equipment) and payment integration
- Secured APIs with JWT authentication and role-based access control (RBAC).
- Used React Context for state management and real-time notifications.

SAKAN Hotel Reservation System | *React JS, Flutter, Node JS, MongoDB, Redis***June 2024**

- Designed and implemented a React-based front-end and Node.js back-end for a hotel reservation system with RESTful APIs for seamless communication.
- Integrated MongoDB as the primary database and implemented Redis caching for improved performance.
- Developed a Flutter-based Android application to extend functionality to mobile users.
- Utilized load-balancers to handle increased traffic and enhance system reliability.
- Deployed the front-end on Vercel and back-end on Render for a production-ready environment.

Shopper Project | *React JS, Node.js***February 2024**

- Developed a full-stack e-commerce platform using React for the front-end and Node.js for the back-end APIs.
- Implemented dynamic product reviews, category filtering, and detailed product pages for an enhanced shopping experience.
- Optimized database interactions for scalability and performance.

Corona-Watch Dashboard | *React JS, Node.js, APIs***March 2024**

- Built a full-stack dashboard using React and Node.js, with API integrations for real-time COVID-19 statistics, weather updates, and cryptocurrency data.
- Designed a responsive and accessible user interface with interactive charts and data visualization.
- Deployed the application for seamless access and usability.
